

VERICORD IQ3 ENTERPRISE INTEGRATION WITH MYGOVERNMENTONLINE

Super-charge your permits, licensing & code enforcement inspections process!

1. INTEGRATED PARTNER

Vericord is a fully integrated MGO partner. IQ3 provides MGO customers with an inspection tool like no other, designed to streamline the inspection process in the field or virtually. IQ3 is an easy-to-use, app-based tool configured to the normal workflow and checklist of the inspector, and it runs on any Android or iOS mobile device.

IQ3 can also virtualize the inspector workload where necessary. Remote Video Inspections (RVI) are especially useful for reducing re-inspect trips and conducting standard annual re-permitting inspections. Request a free demo and have all your questions addressed in person.

2. CAPABILITIES

- Compatible with any smart device (Android or Apple iOS)
- Inspector workflow configured to match the inspection type (for example, code enforcement, permitting, or fire)
- Reports are automatically completed and uploaded

- Capture photos and record video of every inspection event
- Digital on-screen measuring tool in the IQ3 app
- Live stream capability for every event
- Video conferencing with up to 10 participants during any inspection
- Initiate RVIs from the MGO Web Console
- Schedule and initiate on-site inspections from the MGO Mobile App
- IQ3 inspection confirmations immediately accessible in the MGO portal
- Supervisor event monitoring from the MGO Web Console
- Report requests, generation, and sharing from the MGO Web Console
- ...and much more!

3. SECURITY

- OAuth 2.0 secure authentication and authorization
- Fully redundant cloud infrastructure
- Load balancing and caching mechanisms for optimum performance

Plug in IQ3 and boost your MGO capabilities!
